Undervotes									
Total									

Step 1: Tally votes for each candidate and any scattering or undervotes. Tally votes for each group of 20 ballots in the stack of 100.

Step 2: Record the total number of votes for each candidate, scattering and undervotes for each group of 20 ballots.

Step 3: Total the votes across each row to get a subtotal (ST) of votes for each candidate, scattering and undervotes.

Step 4: Record the tally subtotals in the Audit column and the machine tape totals in the EVM column. Record the difference between the Audit and EVM column in the variance (Var.) column.
